## **ASX ANNOUNCEMENT**

### **Jingemia Oil Field Status Report; Extended production test rate increased to 1250 barrels/day.**

**EP 413, Perth Basin.**

**Pancontinental: 1.278%**

Pancontinental Oil and Gas NL advise that the extended production testing (EPT) of the Jingemia-1 oil is continuing as planned with flow rates increased yesterday from a 1,000 to 1,250 barrels oil per day. The flow rate will be progressively increased to planned rates of 2,000 barrels per day or greater.

The production test has been approved for a period of 3 months during which time the well will be produced at a variety of rates as necessary to acquire information on reservoir performance, confirm the commerciality of the discovery and enable the planning of facilities required for full field development.

During the period of the test the oil produced will be trucked to the BP oil refinery south of Perth for sale.

In preparation for these EPT tests, oil storage tanks, load out facilities, roads and all associated earth-works have been constructed and the necessary regulatory approvals and oil sales contracts have been obtained and negotiated.

Jingemia is located in the onshore Perth Basin 24 kms south of the Dongara township and Dongara gas and oil field. The Jingemia prospect is a fault dependent closure very similar to the Hovea oil discovery 5 kms to the north-east.

***(ASX\* listed) Participants in the EP 413***

***Joint Venture are:***

	<b><i>Equity %</i></b>
<b><u>* Pancontinental Oil &amp; Gas NL</u></b> (through subsidiary Euro Pacific Energy Pty Ltd)	<b>1.2780%</b>
